

Noslar is an established (HUB) Audio-Video-Data-Telecommunication and Technology support company delivering consulting, engineering, system solutions, integration, installation and programming services, since 1997. Noslar's forte is providing technical services to various industries as partners. In addition, we provide end-to-end technical solutions directly to the end user. Our team is a diverse group of professionals with a passion for technology and years of hands-on experience, which has enabled us to establish ourselves as a dependable resource.

We provide services to the Industrial, Commercial and Professional Industries. Often we operate as partners and as sub-contractor to Architects, Telecommunication Companies, Manufacturers, General Contractors, Consultants, A/V Dealers and Educational Facilities.

The following are examples of the type of systems and services that we deliver. We'd be happy to provide you with more details please give us a call at **713-680-2080**
