

**Description: Brazosport College**

Brazosport College and Lake Jackson community commissioned Noslar T.I., Inc and as well known local Architect to design a much-needed shared facility. This is used for educational lectures and community events.

The building incorporates a large sectional meeting room with configured technology whether room is used in sections as an open hall. The facility also houses 15 smaller meeting rooms, a boardroom, a teleconference lecture hall. Intrinsic to the design was a fully automated audio/visual control system with integrated equipment. One touch panel is embedded within the Professor's lectern and the other is located in the rear A/V room equipment rack. The touch panel provides full macro control over the Cameras, VCR's, Telephone, CODEC, Projectors, Projection Screen, Lights and Signal Routing.

A high-resolution front projector provides the image to a large screen, allowing wide angle viewing of VCR's, Computers, Television, Information Channel, Cameras, Document Cameras, Teleconference distant cameras and auxiliary inputs. The three local cameras are controlled via touch screens and have presets for local and far site control. Ten video/data monitors (26-inch) display local signals as well as received signals allow near-field viewing.

**Community & Educational Distance Learning Facilities**

**Application:**

**Multi-Node Distance Education**

Educational studies with A/V Technology and Distance Learning as well as Telecasting.

Community and Corporate use for events, training and show.

**Capabilities:**

- /// Audio & Video Teleconferencing
- /// Computer Presentation
- /// 35mm Slide Presentations
- /// Power Point Presentations
- /// Software Collaboration
- /// VHS/S-VHS sources
- /// DVD/CD sources
- /// Satellite Reception
- /// Document Cameras
- /// Touch Screen Control
- /// Auto Lighting Control
