

Description: ExxonMobil

This award winning design maintains a high level training facility for professional enhancement and learning. The facility has a total of 10 large lecture halls, 2 meeting rooms, 4 small presentation classrooms, one command center and a distribution system. This state of the art training facility is controlled via each presenter's wireless Madero-touch panel, desktop computer touch panel, main control room, and web browser plus a system wide meeting manager.

The technology, design and integration permit's any of the 4 to 6 computers at each classroom to be displayed onto any projector either in dual mode or single full 16/9 screen mode. In addition these classrooms can teleconference other locations via the ExxonMobil network.

Corporate Training Facility
